

When pipes fail, Be prepared.

Get a Carbon Fiber Repair Kit that Lasts

Ready to Deploy

When a pipe fails, time is of the essence. Our kits are pre-measured and ready to be installed right away, so you can get operational with minimal downtime.

Installation Made Easy

Our kits are designed to be installed with no special training required, so any contractor or internal maintenance team can install them.

2 Year Shelf Life

Unlike other polymeric products, our Carbon Fiber Repair Kit can be stored for two years, eliminating costly inventory turnover.

Long Lasting Guarantee

We stand behind our Carbon Fiber Repair Kits. They have an unparalleled durability compared to any other product on the market.

Quick fix. Lasting results.

Our Carbon Fiber Repair Kits provide excellent adhesion to metallic, fiberglass, PVC, and concrete pipes of any shape or curvature. Engineered to withstand up to 1,000 psi for many applications. They are non-hazardous, non-flammable, solvent-free, and odorless.
